

PromoCell offers human endothelial cells available from large blood vessels and from the microvasculature (MV) and also available from HLA-typed donors. Growth media optimized for each cell type ensure

optimal cell culture performance. Request our options for GMP grade cell culture media for endothelial cells. We offer endothelial cell media and everything you need for your endothelial cell culture application.

Optimized cell culture media

Endothelial Cell Growth Medium MV (C-22020): Low-serum cell culture medium for endothelial cells from microvascular vessels, the coronary artery, and the aorta. Endothelial Cell Growth Medium MV 2 (C-22022) offers a more defined composition (containing i.a. VEGF).

Endothelial Cell Growth Medium (C-22010): Low-serum cell culture medium for endothelial cells from large blood vessels. Endothelial Cell Growth Medium 2 (C-22011) offers a more defined composition (containing i.a. VEGF).
