

# Pilot Evaluation Batch program

From formulation to confident scale-up

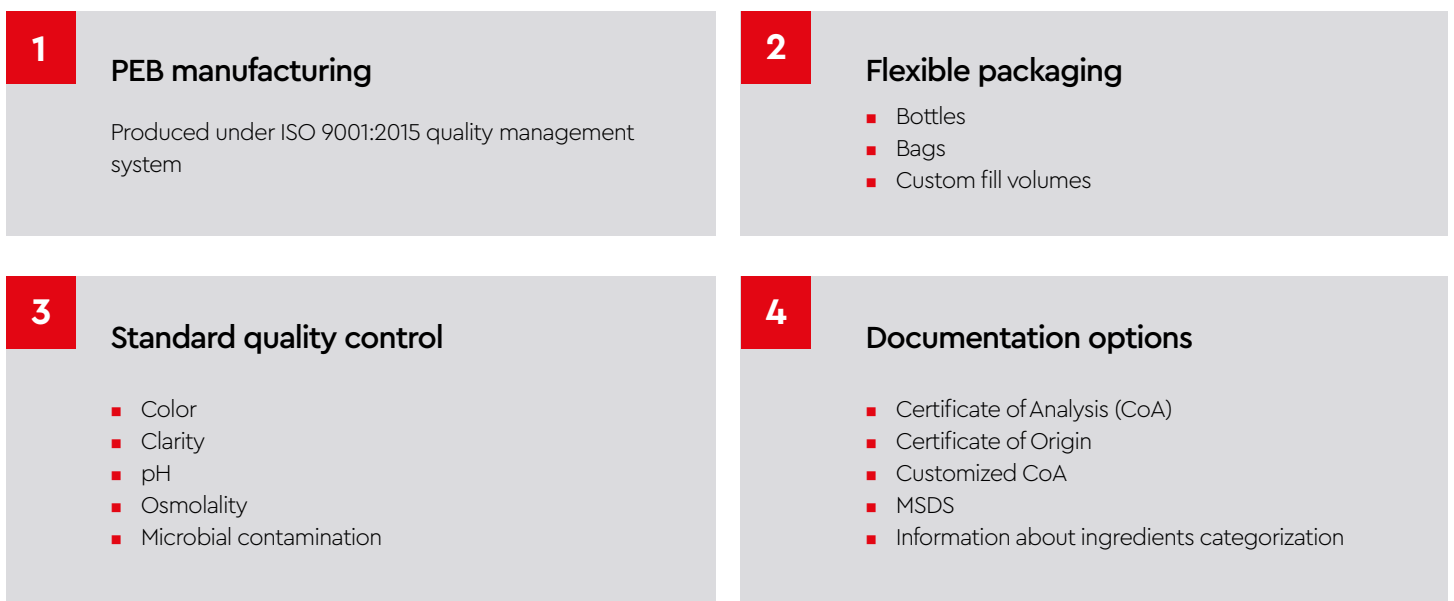

## Validate performance before GMP scale-up

GMP-scale production of cell culture media can be complex and risky. Our Pilot Evaluation Batch (PEB) program<sup>#</sup> is a pilot-scale media manufacturing service designed to act as a bridge to Excipient GMP-grade\* media.

### Benefits

- Evaluates formulation performance
- Ensures process compatibility
- Reduces scale-up risk
- Supports data-backed manufacturing readiness

## The value we bring to therapy developers

## Clear deliverables. Actionable evaluation. Confident next steps.
